

CREDANT Solutions for the UK Public Sector

IT security products sold to public entities in the UK require the CCT Mark of assurance

REQUIREMENT OVERVIEW

“Government information systems must use appropriate security products and services which have a minimum assurance of the CCT Mark,” according to the Central Sponsor for Information Assurance (CSIA) in the United Kingdom.

Awarded by the CESG, the National Technical Authority, certification for the CCTM provides a Government quality mark for the public and private sectors based on accredited, independent testing. The award is designed to prove the validity of security functionality claims made by vendors. Simply put, the CCTM helps assure public bodies that an IT product or service does “what it says on the box.”

The CCTM is intended primarily for IT products and services to ensure that they meet information assurance requirements at Government Impact Levels 1 and 2. Certification is required for purchases by central government entities. It also applies to purchases by the wider public sector, particularly the National Health Service (NHS), schools, local authorities, police departments and criminal justice entities.

Furthermore, the CCTM satisfies the minimum assurance requirements for use in systems supporting the Transformational Government agenda.

CERTIFIED SOLUTIONS WITH CREDANT

After rigorous government testing, CREDANT Technologies was awarded the CCT Mark for the CREDANT Mobile Guardian Enterprise Edition. This award provides a seal of approval for Government entities to purchase CREDANT security solutions.

In addition, CREDANT has been validated by the Common Criteria Evaluation and Validation Scheme (CCEVS) process. Like the CCTM, this ensures both public and private sector clients that CREDANT has passed the highest levels of scrutiny and security testing.

CREDANT

CREDANT is the Trusted Expert in Data Protection. Founded in 2001, CREDANT enables organizations to control, manage and protect data on vulnerable laptops, desktops, PCs, Macs, smartphones and removable media devices. Protecting sensitive information on more than 7 million endpoints at over 1,000 global customers, CREDANT provides the most comprehensive mobile data protection and management platform.

CREDANT SOLUTION

CREDANT encryption management solutions ensure that encryption and security mandates are consistently and efficiently enforced – regardless of where the data resides.

ONLY CREDANT ENABLES ORGANIZATIONS TO:

- › Manage encryption and secure data across multiple endpoints from a common management platform
 - › Full Disk Encryption (FDE)
 - › Self-Encrypting Drives
 - › Policy-Based File/Folder Encryption
 - › Mobile Devices and Smartphones
 - › Removable Media
 - › Windows[®] BitLocker[™]
- › Create automatic audit trails that offer proof of end-to-end data security
- › Provide a transparent end-user interface that supports user productivity while keeping data safe
- › CREDANT provides you with a centrally-managed, highly scalable and architecturally flexible approach to manage all data endpoints. With CREDANT, organizations can:
 - › Help ensure data security, reducing the risk of insider or external attack
 - › Simplify and reduce the workload of maintaining compliance
 - › Provide confidentiality, privacy and auditing of data residing on any endpoint
 - › Integrate and manage multiple encryption solutions into a single management tool set
